

La multiplication en lignes à un nombre 2 – corrigé

$$142 \times 2 = 284$$

$$(\underline{100} \times 2) + (\underline{40} \times 2) + (2 \times 2)$$

$$\underline{200} + \underline{80} + 4 = 284$$

$$202 \times 3 = 406$$

$$(\underline{200} \times 3) + (\underline{0} \times 3) + (2 \times 3)$$

$$\underline{400} + \underline{0} + 6 = 406$$

$$91 \times 5 = 455$$

$$(\underline{90} \times 5) + (1 \times 5)$$

$$\underline{450} + 5 = 455$$

$$310 \times 3 = 930$$

$$(\underline{300} \times 3) + (\underline{10} \times 3) + (0 \times 3)$$

$$\underline{900} + \underline{30} + 0 = 930$$

$$192 \times 5 = 960$$

$$(\underline{100} \times 5) + (\underline{90} \times 5) + (2 \times 5)$$

$$\underline{500} + \underline{450} + 10 = 960$$
