

Décomposer le 8

- Prends 8 objets (grosses pâtes, billes plates...)
- Cherche toutes les façons de partager 8, puis écris les chiffres dans la maison... ex : 0+8
- Essaie de chercher la maison du 6, du 7, du 9 etc... dessine une maison du 6

The image shows a worksheet designed to help children learn how to decompose the number 8. It is shaped like a house. At the top, the roof is a triangle with a red border. Inside the roof is a large green number 8. To the right of the roof is a chimney with a blue border, containing 8 red beads arranged in two columns of four. The main body of the house is a vertical rectangle with a blue border, divided into 8 horizontal rows. Each row contains two empty green-outlined boxes on either side of a red plus sign (+). This layout allows children to write down different ways to split the number 8 into two parts, such as 0+8, 1+7, 2+6, 3+5, 4+4, 5+3, 6+2, and 7+1.
